Patient address

Date

Dear US Customs and FDA Agents,

I wish to import Lorenzo's Oil for my child, (patient name), for his/her own personal use for a condition he/she has, (condition name). Lorenzo's Oil is not available in the US which is why I am having to buy it from abroad. I have attached a letter of justification from my child's physician, which explains why he/she needs this drug, as well as a prescription that the physician has issued for it.

I believe this importation meets the requirements of the guidelines issued by the FDA which can be found at the following address –

<https://www.fda.gov/ForIndustry/ImportProgram/ucm173751.htm> – and also outlined in the Personal Importation Policy (PIP) document attached. Therefore, the drug and this importation meets the criteria listed below:

- The drug is unapproved and intended for use in a serious medical condition for which there is no effective treatment domestically available.
- There will be no commercialization or promotion of the drug in the United States.
- The drug does not represent an unreasonable health risk to my child as the patient
- The request is accompanied by an affirmation that the drug is for my child's use only and I have provided the name and address of my child's United States-licensed physician responsible for his/her
- The request is for less than a 3-month supply of the drug. My child needs 40ml of the oil once a day, which is 280ml a week, and a total of 3 bottle for 6 weeks.

I would appreciate if you would exercise your enforcement discretion to permit importation of this drug to help me treat my child's condition.

Please do not hesitate to contact me should you require any additional clarification either by phone or email.

Yours sincerely,
